RESISTING ASSIMILATION

Black immigrant population climbs to 4.6 million and is projected to reach 9.5 million by 2060

Total U.S. Black foreign-born population, in millions

% of U.S. Black population who are foreign born

Note: For data from 2000 to 2019, "U.S. Black foreign born population" refers to all people who self-identify as Black, inclusive of single-race Black, multiracial Black and Black Hispanic people and were born outside of the U.S. to non-U.S. citizen parents. Data from 1980, 1990, 2030 and later only includes data for single-race Black foreign-born population.

Source: Pew Research Center analysis of decennial census data from 1980, 1990 and 2000 and American Community Survey data from 2010 and 2019. Census Bureau 2017 population projections for 2020-2060.

"One-in-Ten Black People Living in the U.S. Are Immigrants"

PEW RESEARCH CENTER

BY THE NUMBERS

- One in ten Black people in the US are immigrants, and this is expected to grow to one in three by 2060.
- Africa has accounted for the fastest growth in the US Black immigrant population (246% growth between 2000 and 2019).

SOME IMMIGRANTS RESIST ASSIMILATION

- Because proximal hosts are themselves marginalized (Waters 1999, Portes and Zhou 1993, Mittelberg and Waters 1992)
- Because immigrant enclaves confer social capital (Laitin 1995, Portes and Manning 1985)
- Because immigrants react to discriminatory environments (Abdelgadir and Fouka 2020, Fouka 2019)

RESISTANCE AS RATIONAL RESPONSE

- Ethiopian immigrants in DC prefer to identify as African, Ethiopian American rather than Black (Chako 2003)
- African immigrant students in Atlanta use ethnicity as a buffer against discrimination (Ogundipe 2011)
- Children of middle-income Nigerian immigrants to the US adopt a hybrid identity to distance themselves from low-income African Americans (Imoagene 2017)
- West Indian and West African immigrant children in NYC retain elements of their immigrant culture deliberately, through cuisine, fashion and language (Sall 2019)
- This is all a rational response to the threat of lowering their social and Econ status (Hamilton 2019)

THE THREAT OF RACIAL LUMPING

- “at automatic and non conscious levels, Black immigrants and Black Americans are perceived in the same way. Whether by passersby, customers walking around a store, or drivers in an upper-class neighborhood, Black immigrants will be categorized as Black and subjected to the same kinds of race-based bias and discrimination as American Blacks” (Tormala and Deaux 2006)
- “by evoking their foreign status” Black immigrants aim to “exit from the stigmatized black category” (Waters 1999)
- Two questions remain:
 - Race is a “bundle of sticks” (Sen and Wasow 2016): how do we know that it is this aspect of race that is doing the work?
 - This core insight about resistance comes out of rich, qualitative case studies that do not hold constant other facets of the immigrant experience: can we isolate one factor?

SOMALI IMMIGRANTS

- A powerful research design that naturally isolates our key independent variable of interest: phenotypic overlap with African Americans
- A key demographic group: one of the fastest growing groups of African migrants to the US

OBJECTIVE	GENERATE INSIGHTS ABOUT VARIATION IN IMMIGRANT EXPERIENCES	BUILD OBJECTIVE MEASURE OF VARIATION IN PROBABILITY OF RACIAL LUMPING	
RESULTS	SOME AFRICAN IMMIGRANTS (FROM HORN) PERCEIVE THEMSELVES AS MORE IDENTIFIABLE AS FOREIGN	IMMIGRANTS FROM THE HORN ARE MORE IDENTIFIABLE AS IMMIGRANTS	

RESULTS

	INTERVIEWS	LAB	SURVEY
DESCRIPTION	33 AFRICAN MIGRANTS AT OSU	170 UNDERGRADUATES AT OSU	520 (293/227) MEMBERS OF COLUMBUS SOMALI COMMUNITIES
OBJECTIVE	GENERATE INSIGHTS ABOUT VARIATION IN IMMIGRANT EXPERIENCES	BUILD OBJECTIVE MEASURE OF VARIATION IN PROBABILITY OF RACIAL LUMPING	TEST MAIN HYPOTHESIS
RESULTS	SOME AFRICAN IMMIGRANTS (FROM HORN) PERCEIVE THEMSELVES AS MORE IDENTIFIABLE AS FOREIGN	IMMIGRANTS FROM THE HORN ARE MORE IDENTIFIABLE AS IMMIGRANTS	ETHNIC BANTUS (HIGHER RACIAL LUMPING) RESIST MORE THAN ETHNIC SOMALIS; THIS DOESN'T DISAPPEAR OVER TIME

TAKE-AWAYS

- Threat of racial lumping can increase resistance to assimilation
- Racism, and how it shapes the lives of Black Americans, has implications for immigrant integration
- But the research design for this project limits our ability to generalize

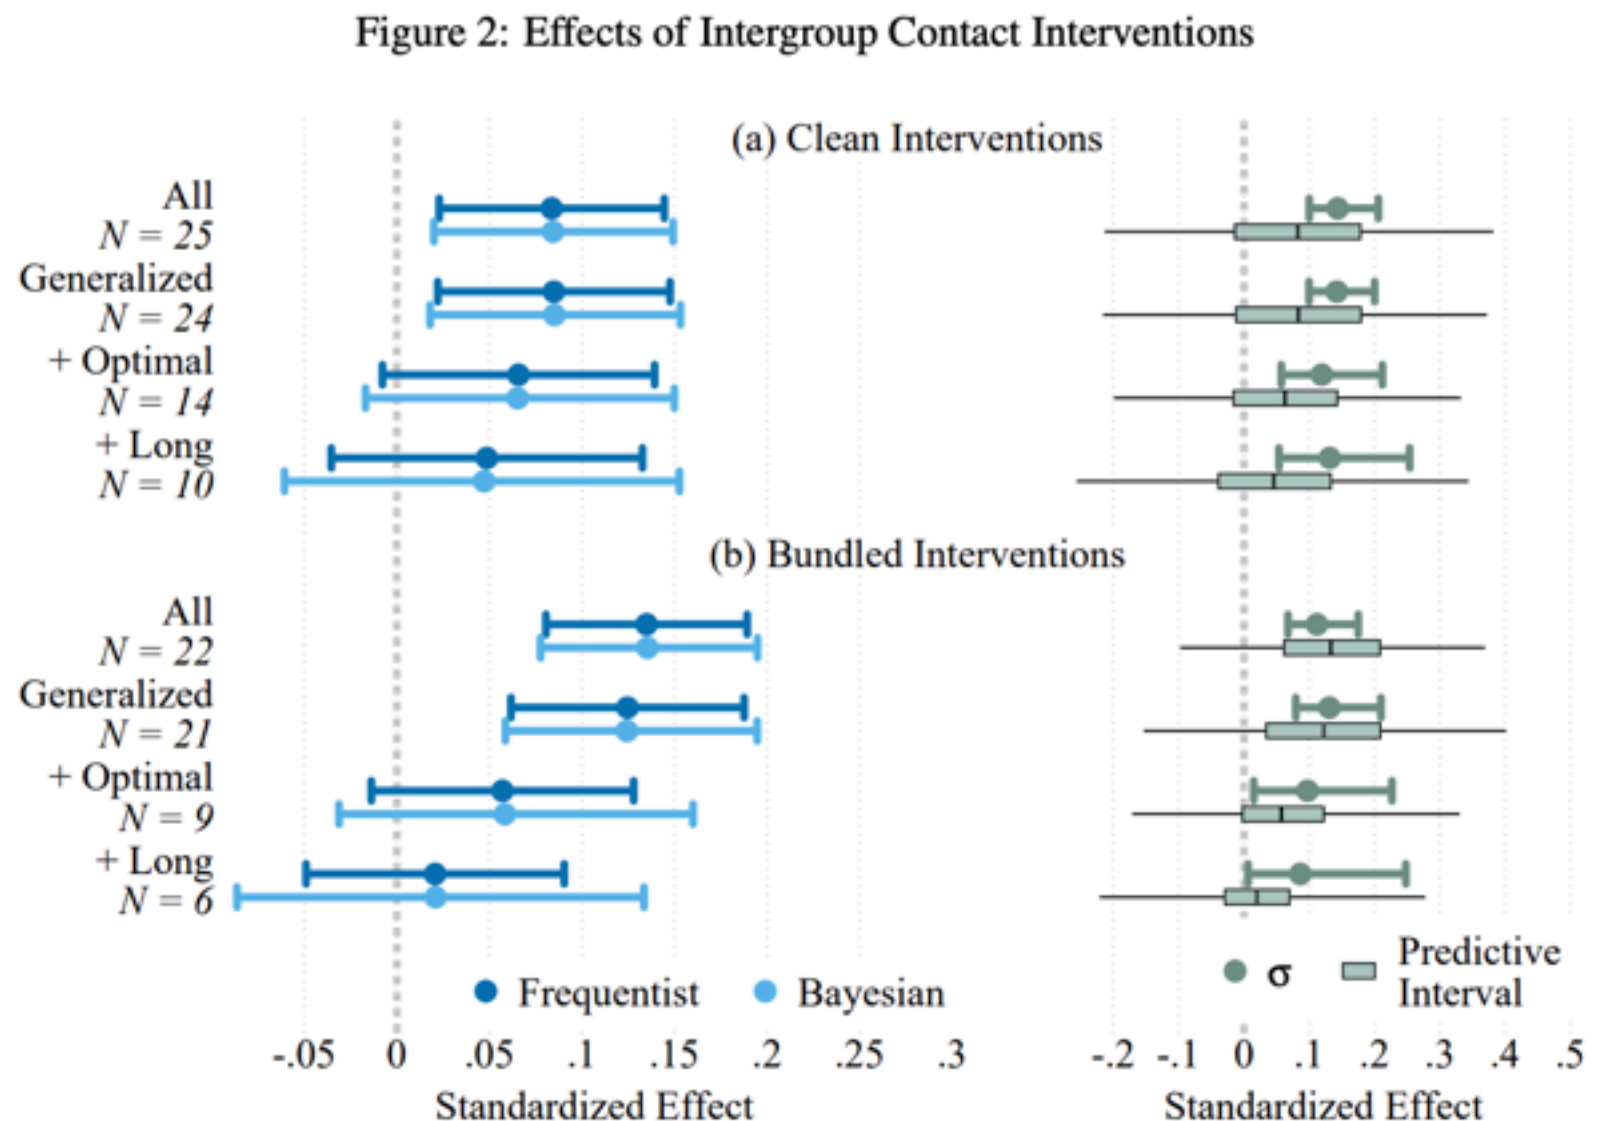

INCREASING INCLUSION

INCREASING INCLUSION

- Contact theory
- Exceptional migrant narratives
- Generating empathy

INCREASING INCLUSION: CONTACT

- Effects are small but robust
- Effects are narrow

Notes: The figure shows the output of frequentist and Bayesian meta-analysis of sets of experiment-level effect sizes and standard errors. Panel (a) considers only clean comparisons of high with low or no intergroup contact. Panel (b) considers only comparisons of bundled outgroup contact relative to a control group. Within these two groups, I show estimates using all outcomes and interventions (All), and only outcomes that are generalized to the outgroup (Generalized), only generalized outcomes with in-person contact interventions that satisfy all four Allport conditions (+ Optimal), and the same, but adding the restriction that the contact lasts at least four hours (+ Long). N denotes the number of experiments included in each sample. Point estimates and 95% confidence intervals for the average effect of contact (τ) are denoted in blue, while the equivalent for the standard deviation of effects across settings (σ) is denoted in green. Box plots describe posterior predictive intervals for the effect of contact in a new setting (τ_{K+1}). The whiskers span the 95% interval, the box spans the 50% interval, while the vertical line denotes the mean.

INCREASING INCLUSION: EXCEPTIONAL MIGRANTS

If COVID-19 Vaccines Bring An End To The Pandemic, America Has Immigrants To Thank

December 18, 2020 - 5:00 AM ET

MO SALAH (AL'RABABAH ET AL. 2021)

PARASOCIAL CONTACT HYPOTHESIS

MUSLIM EXCLUSION IS HIGH IN GB

BEFORE AND AFTER SALAH SIGNED WITH LIVERPOOL

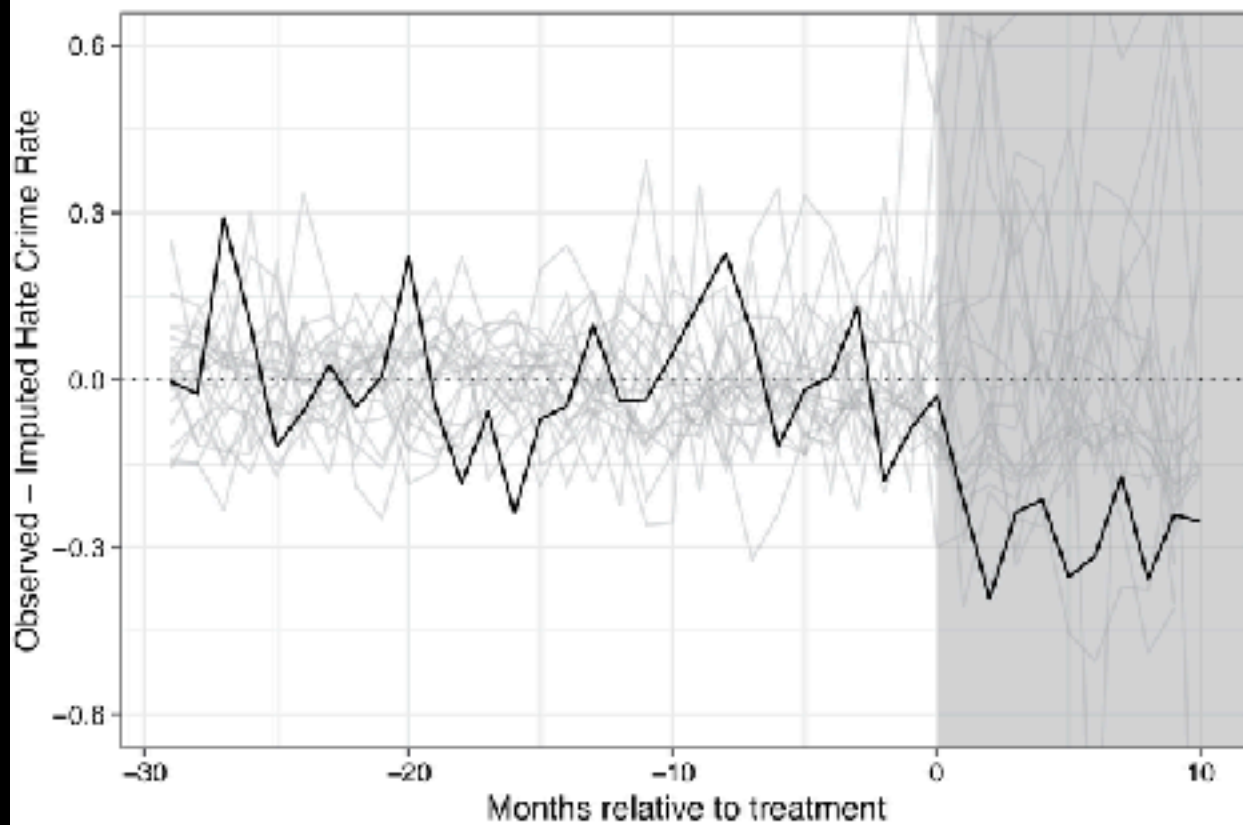

- Crime data
- Twitter data
- Survey data

HATE CRIMES WENT DOWN

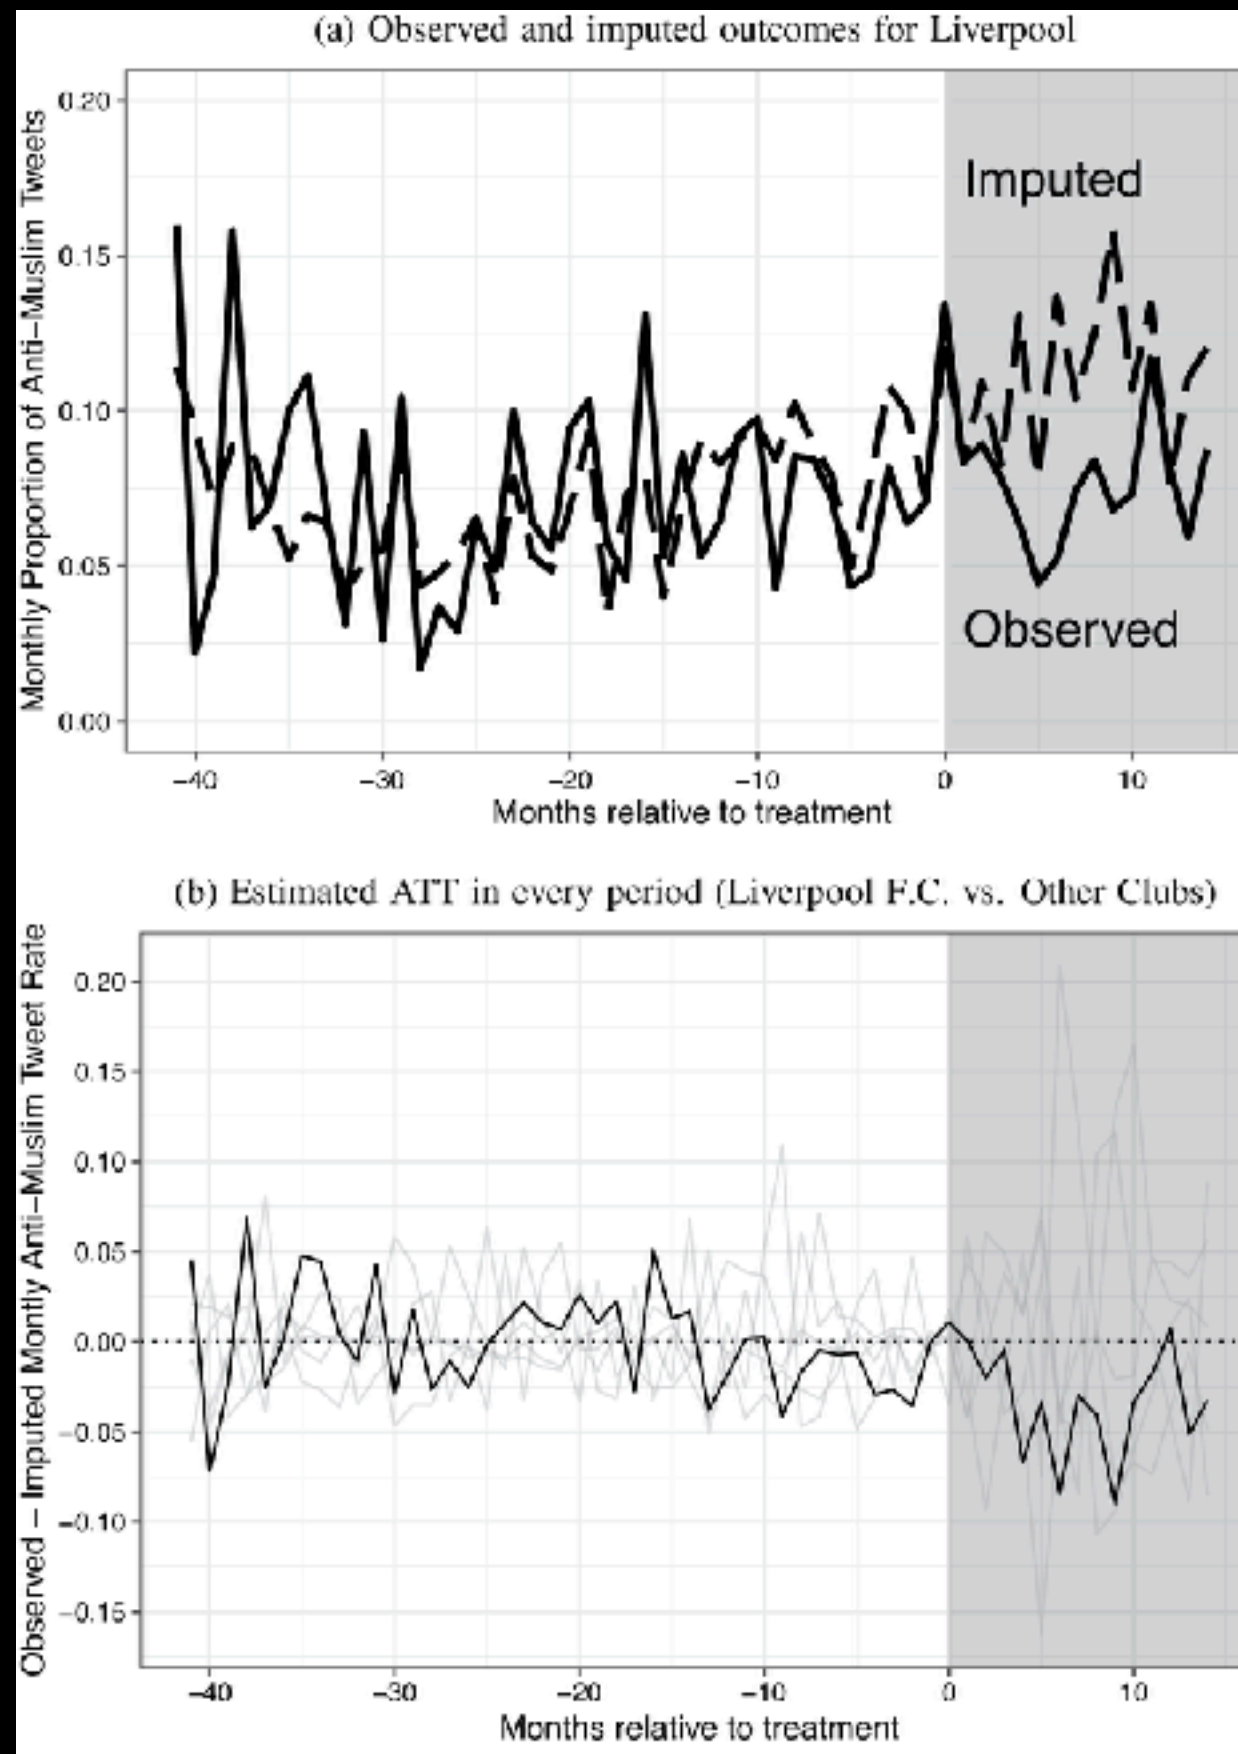

(a) Observed and imputed outcomes for Merseyside

(b) Treatment effect estimates for Merseyside and placebo units

HATE TWEETS WENT DOWN

ATTITUDES IMPROVED

In addition to his goal scoring, Salah is known for an attachment to his Muslim identity both on and off the pitch. After every goal he scores, Salah touches his head to the ground in prayer. He also fasts during Ramadan (except on match days) and shares well wishes with his followers on social media during Islamic holidays. He named his daughter Makka after Islam's holiest site (Mecca).¹⁸

But at night, around 9 o'clock, we
couldn't do anything.

Day In The Life - Jordan

UNHCR, the UN Refugee Agency

March 2, 2019 ·

PREJUDICE-REDUCTION

- Broockman and Kalla have shown that humanizing narratives can reduce transphobia (2016, 2020) and prejudice toward undocumented migrants (2020)
- Simonovits et al. (2018) have shown that a video game in which Hungarians put themselves in the shoes of a Roma reduces their prejudice even one month later, with spillover effects for refugees
- I've conducted a series of studies testing whether empathy-generating narratives can improve migrant inclusion
 - PNAS 2018
 - APSR 2021
 - PSRM 2025

PEAS (2018)

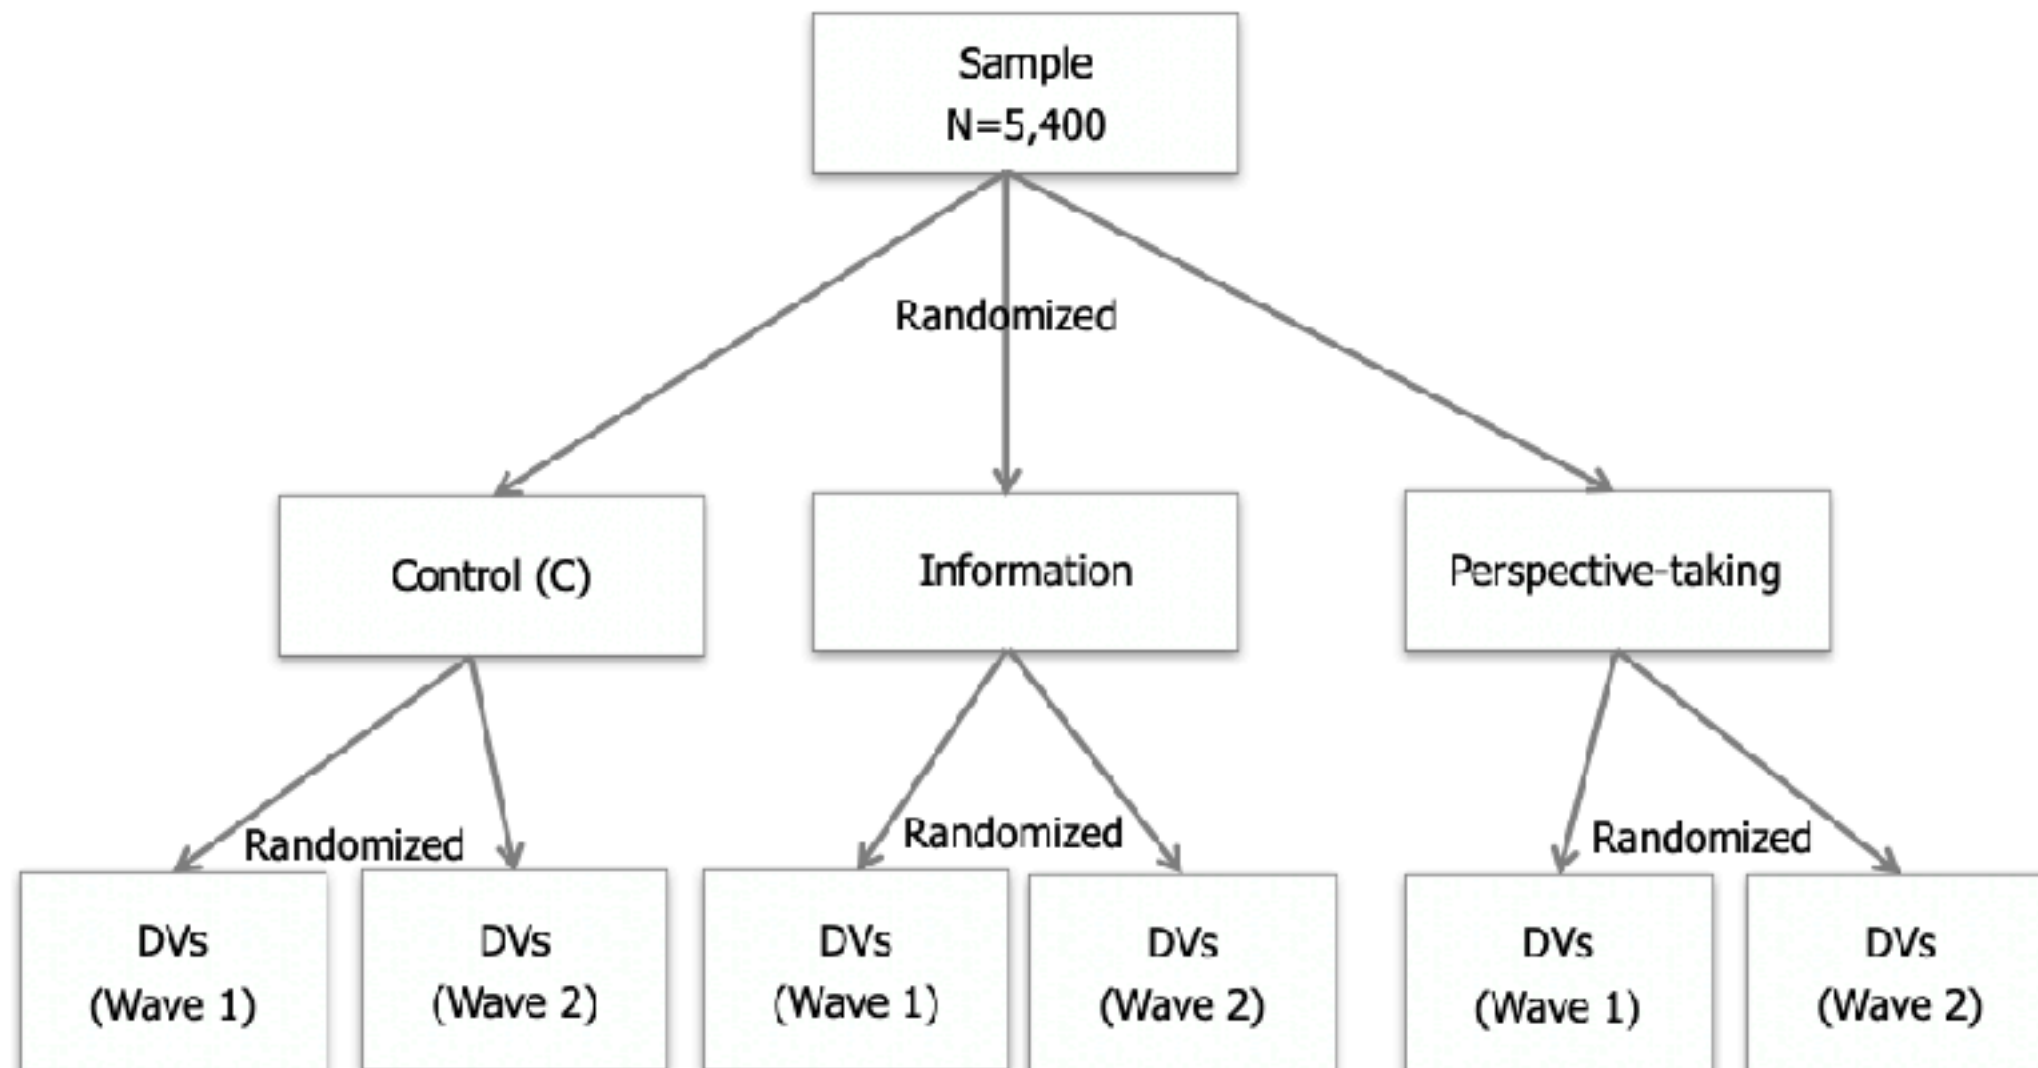

Fig. S1. Research design

THE EMPATHY TREATMENT

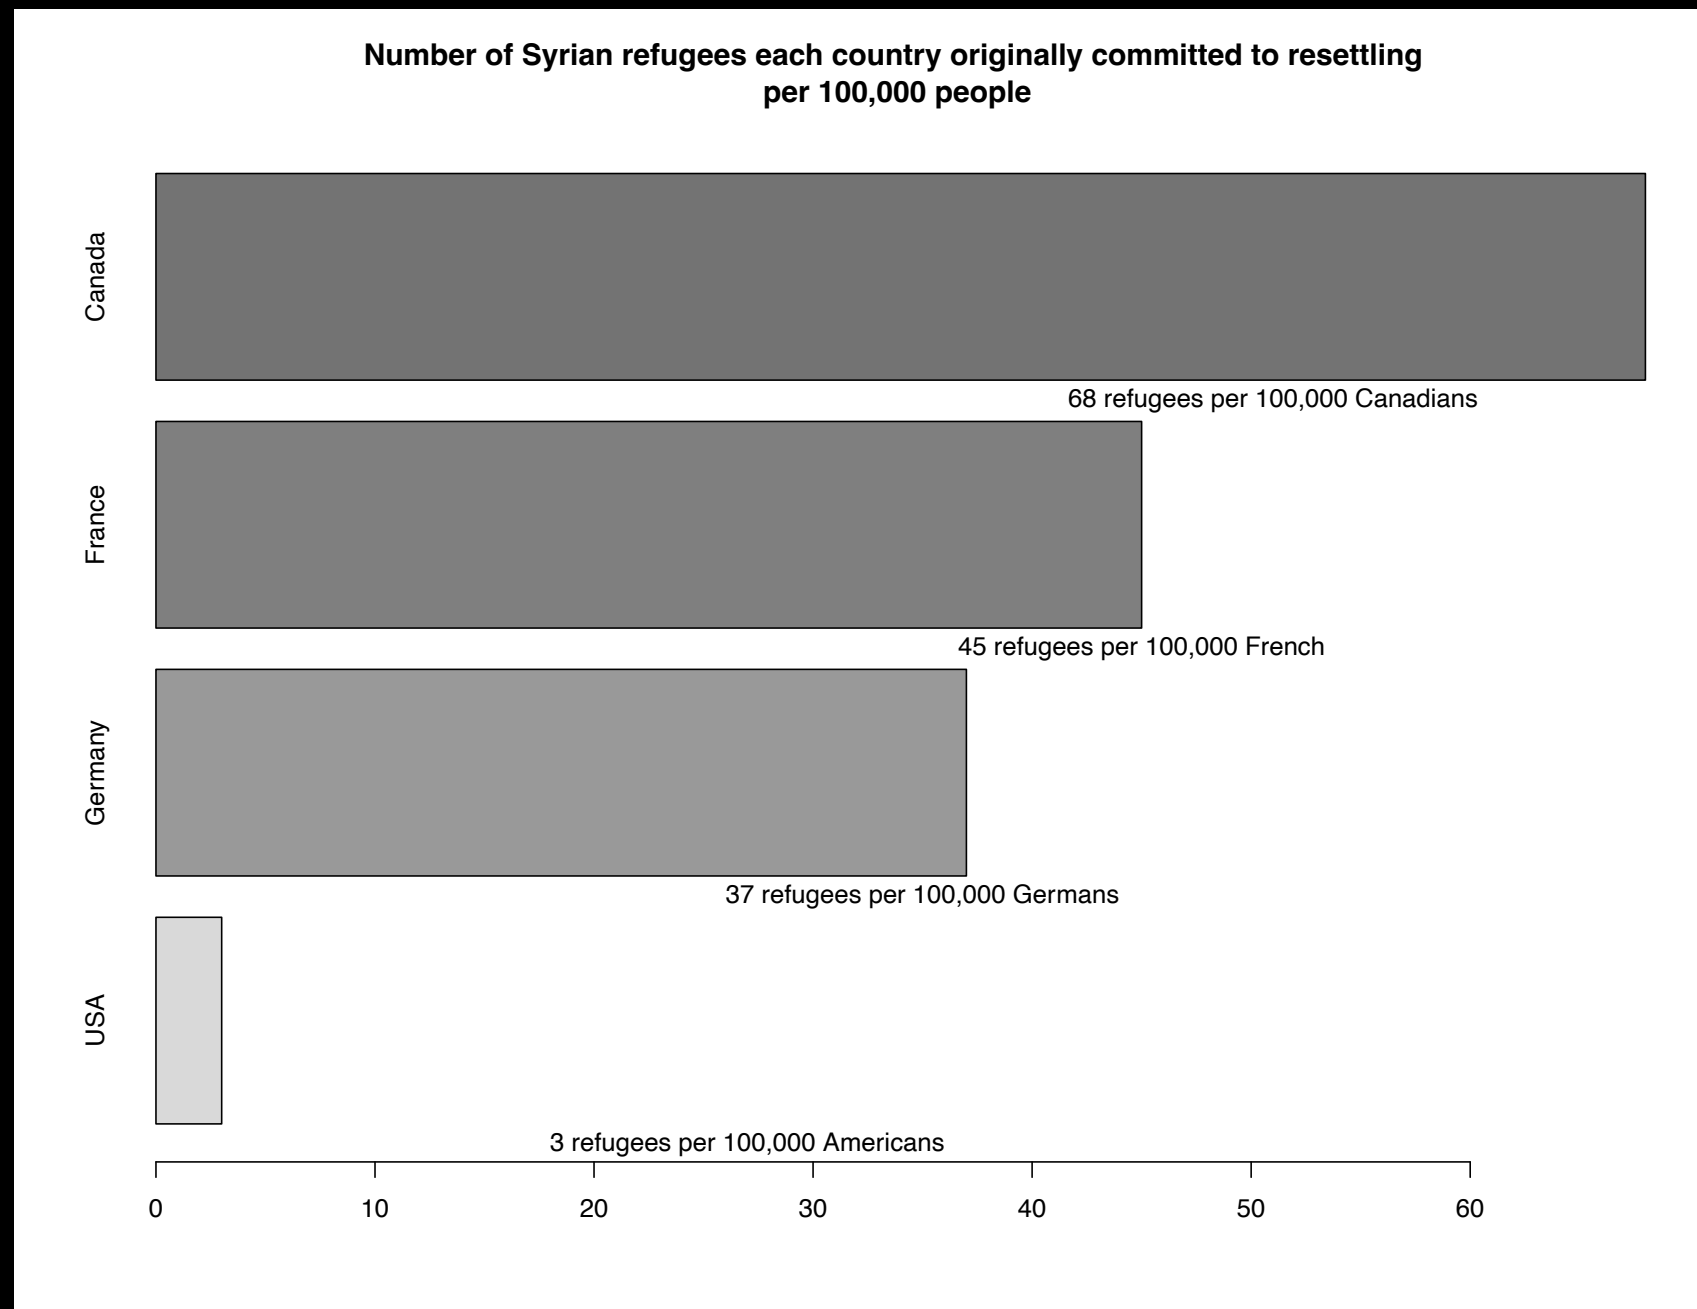

EMPATHY TREATMENT

- Lesson plan from Pulitzer Center:
- “Imagine you are a refugee fleeing persecution in a war-torn country:
 - What would you take with you?
 - Where would you flee to?
 - What do you feel would be the biggest challenge for you?”

THE INFORMATION TREATMENT

INFORMATIONAL TREATMENT

Did you know?

BEHAVIORAL OUTCOME MEASURE

The next President of the United States will have important decisions to make about how to deal with the Syrian refugee crisis. Would you be interested in expressing your support for refugees to the next President of the United States in an anonymous forum?

"Give me your tired, your poor, Your huddled masses yearning to breathe free, The wretched refuse of your teeming shore. Send these, the homeless, tempest-tossed to me, I lift my lamp beside the golden door!"

"Don't be a douche. Help these poor people."

"Dear POTUS, I express my support of refugees coming to the United States. Especially the women and children, they need food and healthcare. Thanks so much."

"**Don't do it.** We are over crowded and can't even take care of our own. We have homeless veterans on our streets and can't help them. How do we have money to help immigrants **who will potentially blow us up** in the end? It's a waste of our resources! Even passing a background check you can't measure their true intention! I would much rather see the US help US citizens instead of refugees. I'm scared to leave my home. There are refugees everywhere and they are rude and treat me like I'm invading their space! They're invading mine! I held the door open for one at a department store and was called a female dog! Please **save our country!**"

"I absolutely do not support accepting refugees into the US. We have people here who are suffering. Help Americans before you help everyone else."

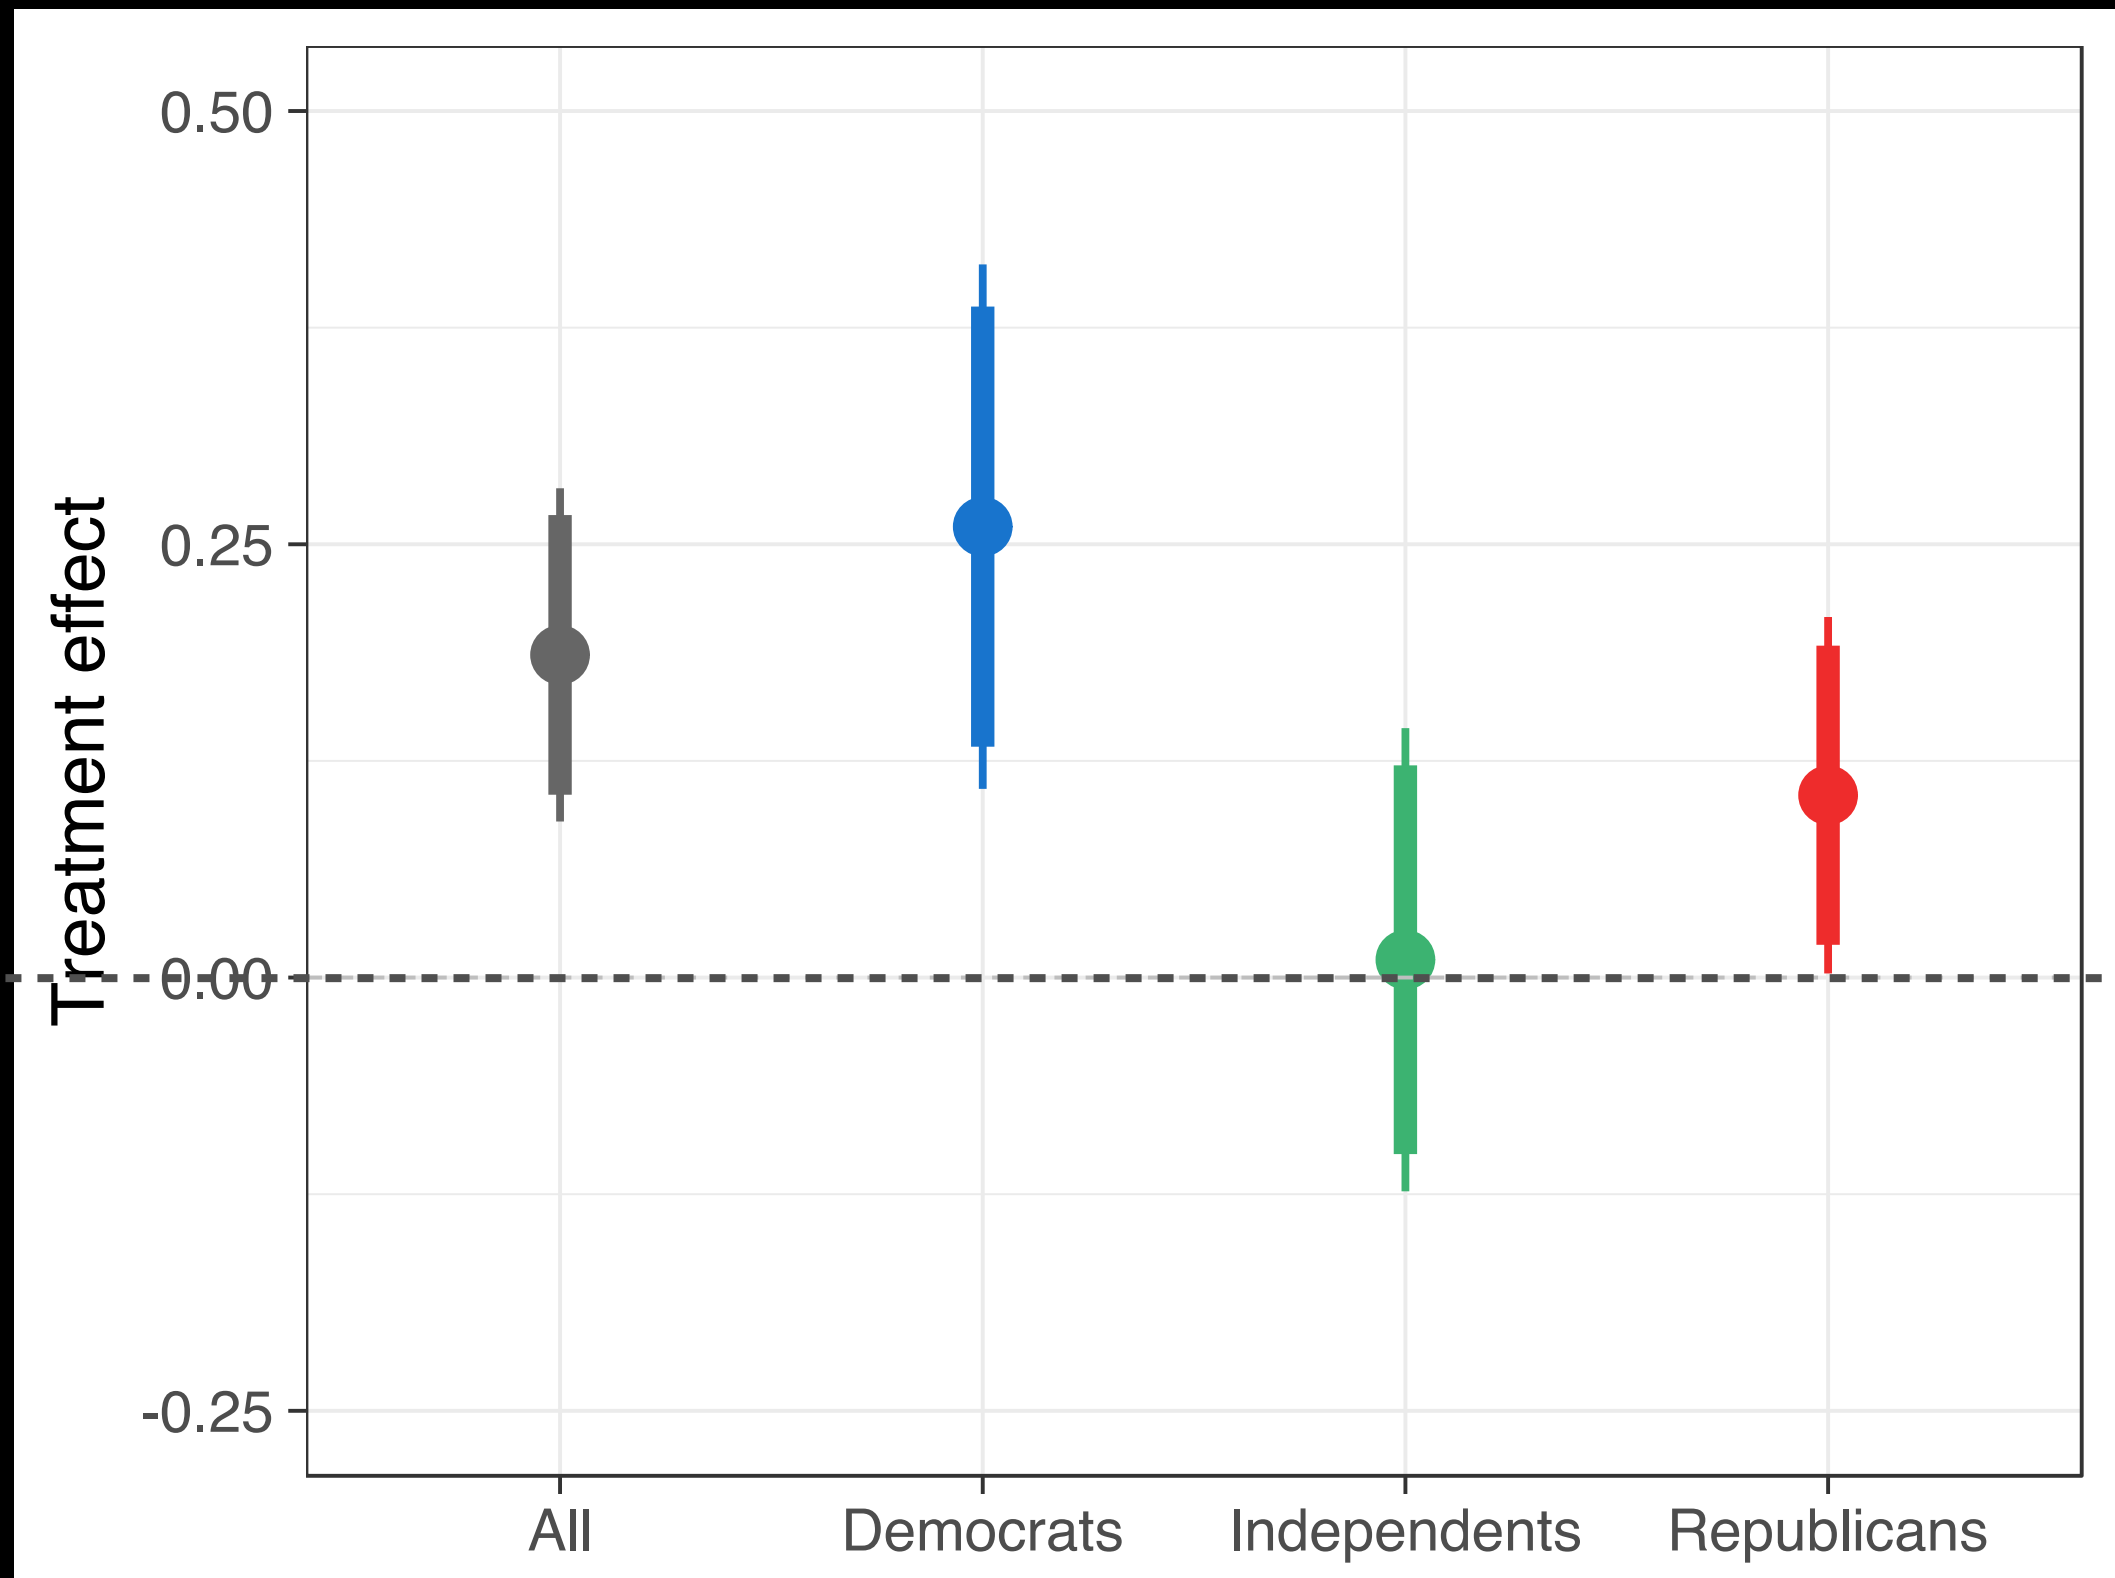

"Sorry have no support for them. They should be banned as all **Muslims** should."

WHAT DID WE FIND?

EMPATHY WORKED, INFORMATION DIDN'T

DRIVEN BY **DEMOCRATS**, BUT WORKED ALSO ON **REPUBLICANS**

A SUBSTANTIVE EFFECT

	CONTROL	EMPATHY	INCREASE	SIGNATURES
FULL SAMPLE	18.8%	20.8%	11%	1,500-2,000
DEMOCRATS	23%	34%	50%	8,250-11,000
REPUBLICANS	4.6%	7.4%	60%	2,100-2,800

BUT...

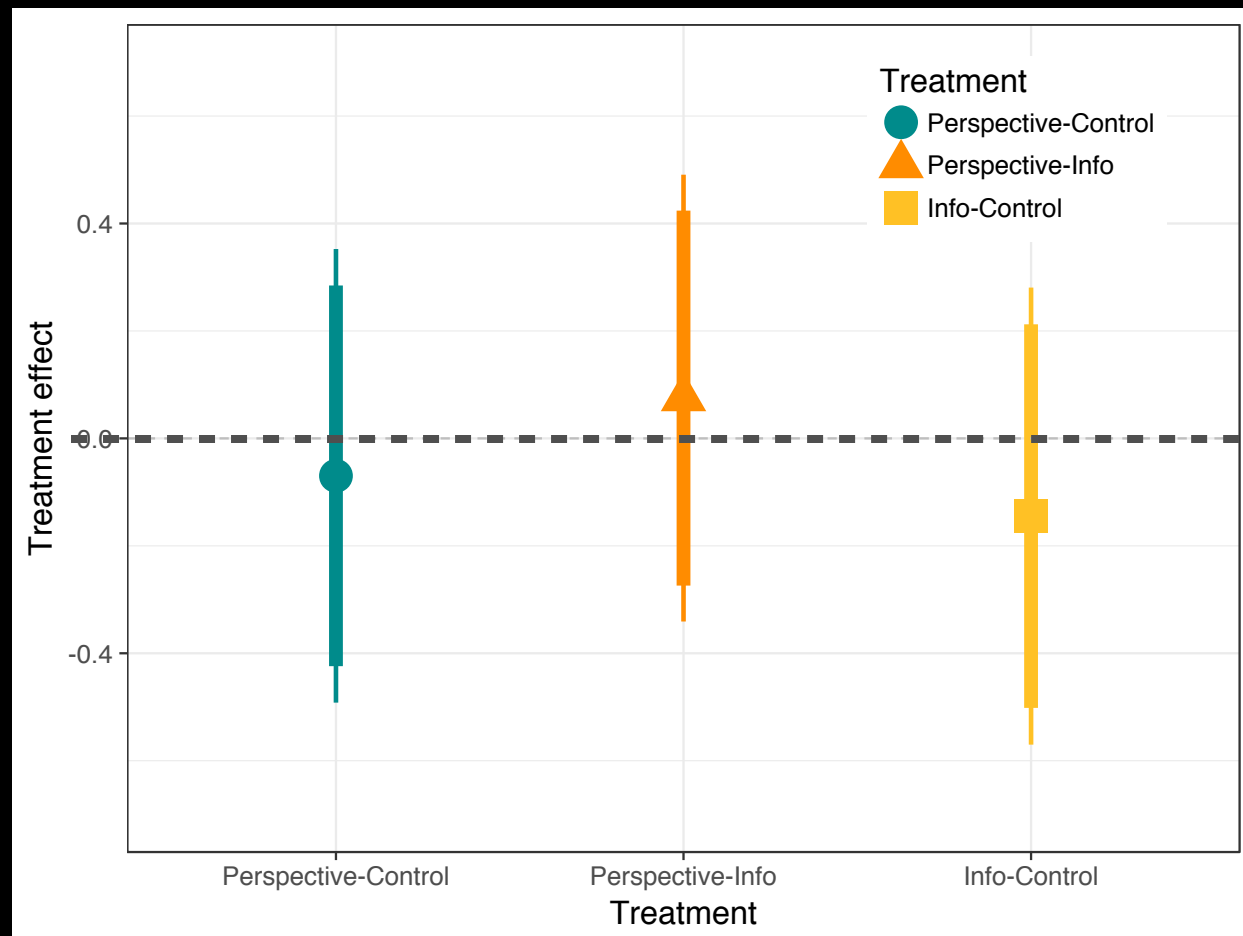

THE EFFECT IS SHORT-TERM

Wave 1

Wave 2

THE EFFECT IS NOT ATTITUDINAL

Refugee rating

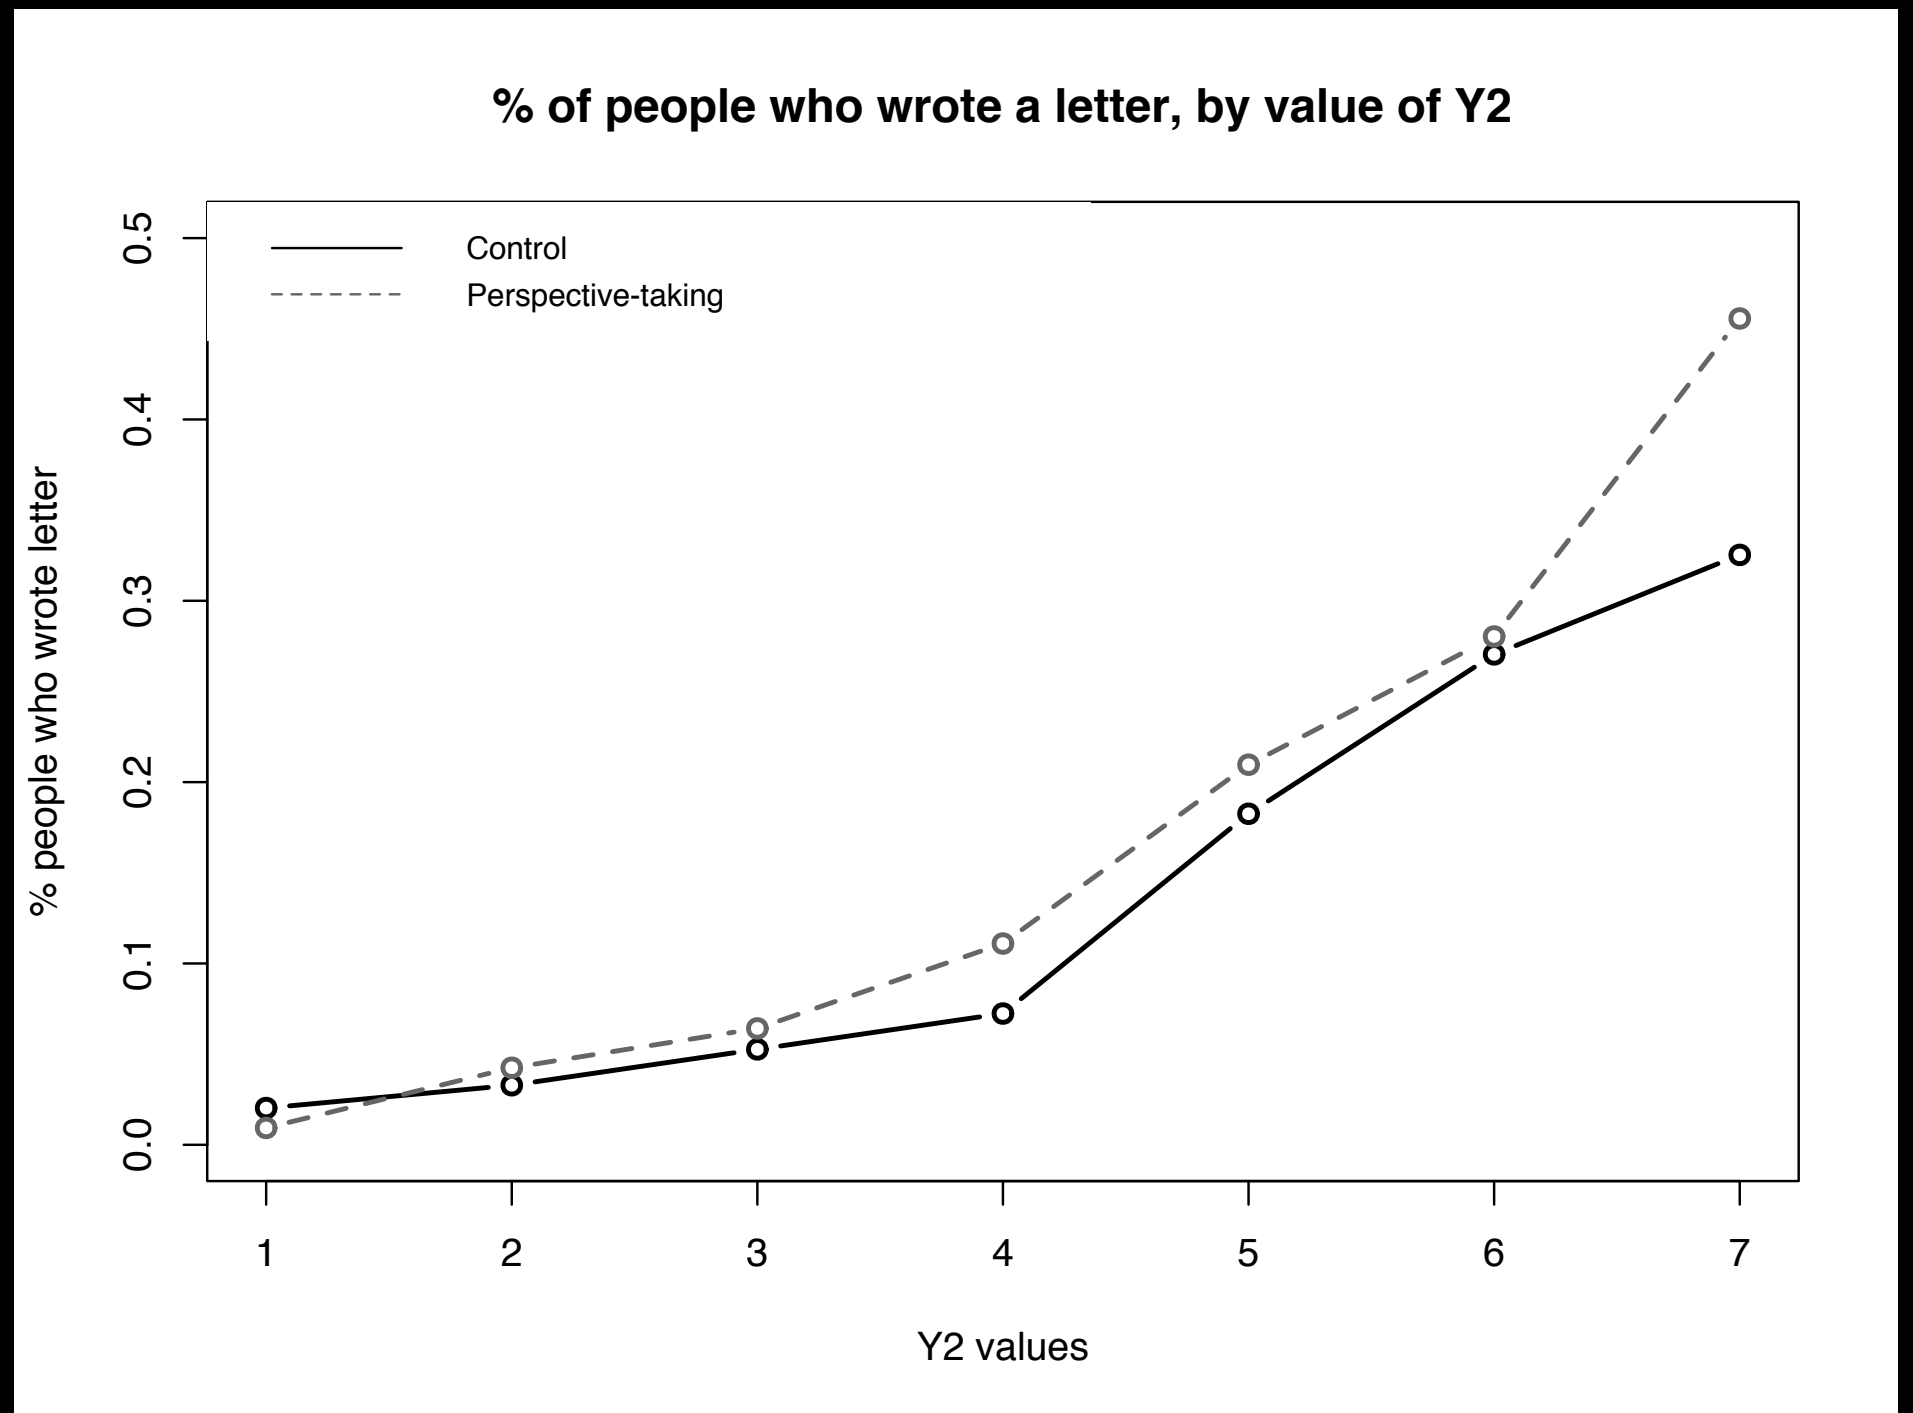

Post-screening

INTERPRETATION: THE NUDGE

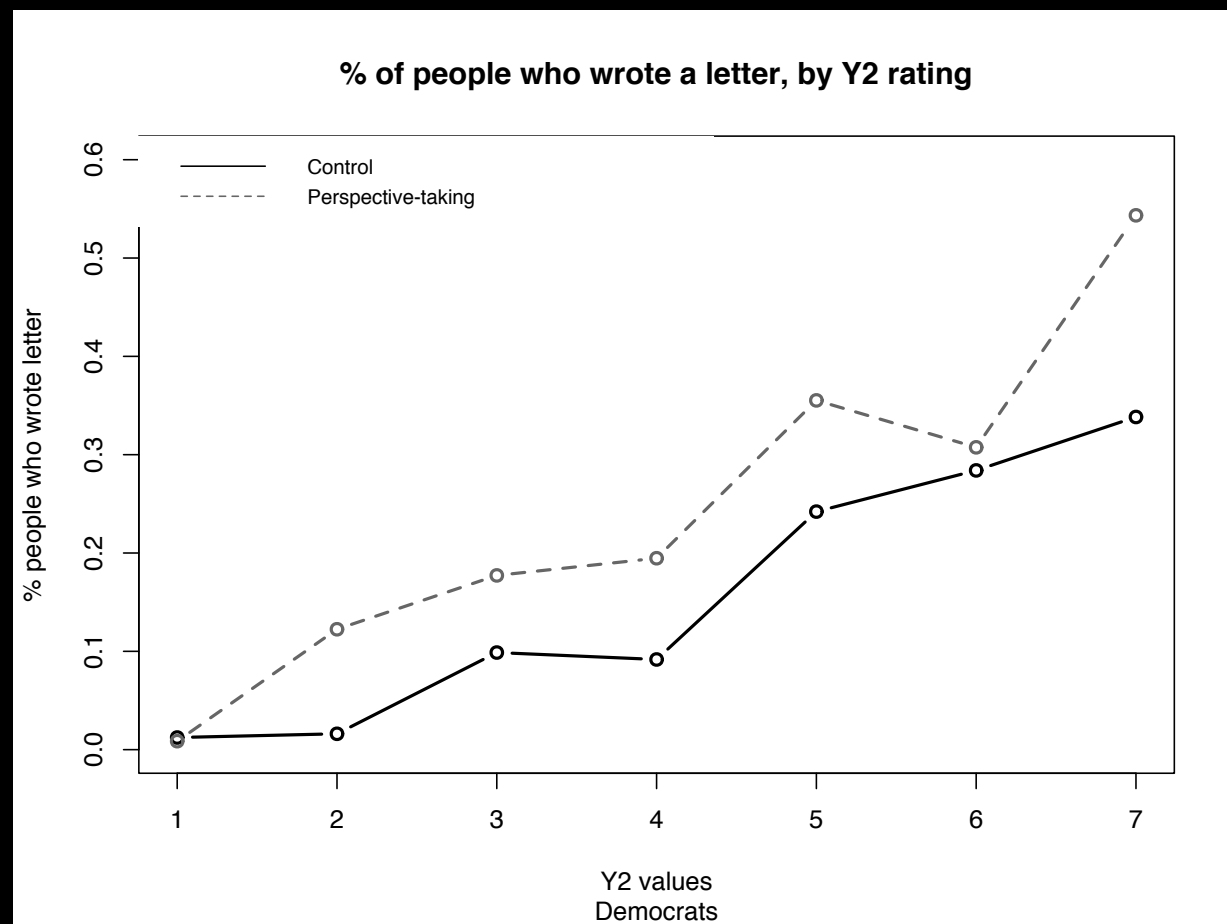

EMPATHY MOBILIZED

Probability
of writing a
positive
letter

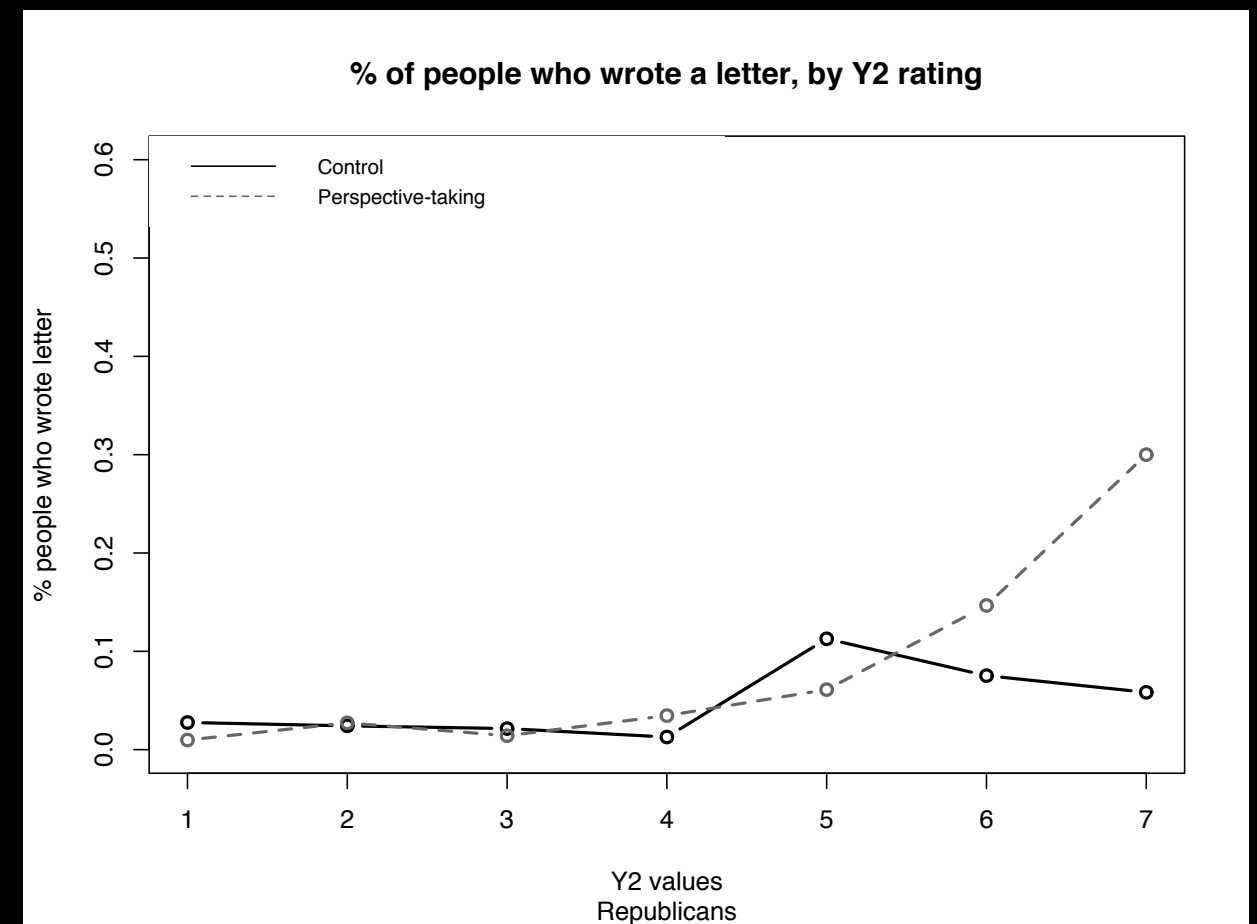

Refugee rating (1: do not admit, 7: admit)

EMPATHY MOBILIZED BOTH DEMOCRATS AND REPUBLICANS

Democrats

Republicans

WHAT WE **LEARNED** FROM PNAS (2018)

- An empathy treatment nudged respondents with positive attitudes toward refugees to act
- An informational treatment did no such thing
- BUT
 - This is one result in one experiment
 - We didn't change anyone's mind

APSR (2021)

- United States thinks of itself as a “nation of immigrants”
- What happens when we remind Americans that (most of them) were once immigrants?

ATTITUDES TOWARD IMMIGRATION

Do you agree or disagree that the United States should limit the number of immigrants entering the country? (From 1, Strongly Agree, to 7, Strongly Disagree)

A SIMPLE PRIME: CONTROL

Do you agree or disagree that the United States should limit the number of immigrants entering the country? (From 1, Strongly Agree, to 7, Strongly Disagree)

Which was the first generation in your family to arrive in America?

A SIMPLE PRIME: **TREATMENT**

Which was the first generation in your family to arrive in America?

Do you agree or disagree that the United States should limit the number of immigrants entering the country? (From 1, Strongly Agree, to 7, Strongly Disagree)

REPEAT THIS IN **THREE** STUDIES

- March 2017
 - Outcome: Support for more open immigration policy (1-7)
 - N=1000
- April 2019
 - Outcome: Support for more open immigration policy (1-7); warmth toward immigrants (0-100)
 - N=1274
- November 2019
 - Outcome: Support for more open immigration policy (1-7); warmth toward immigrants (0-100)
 - N=3818

PRIMING FAMILY HISTORY **INCREASES** **SUPPORT** FOR MORE OPEN IMMIGRATION POLICY

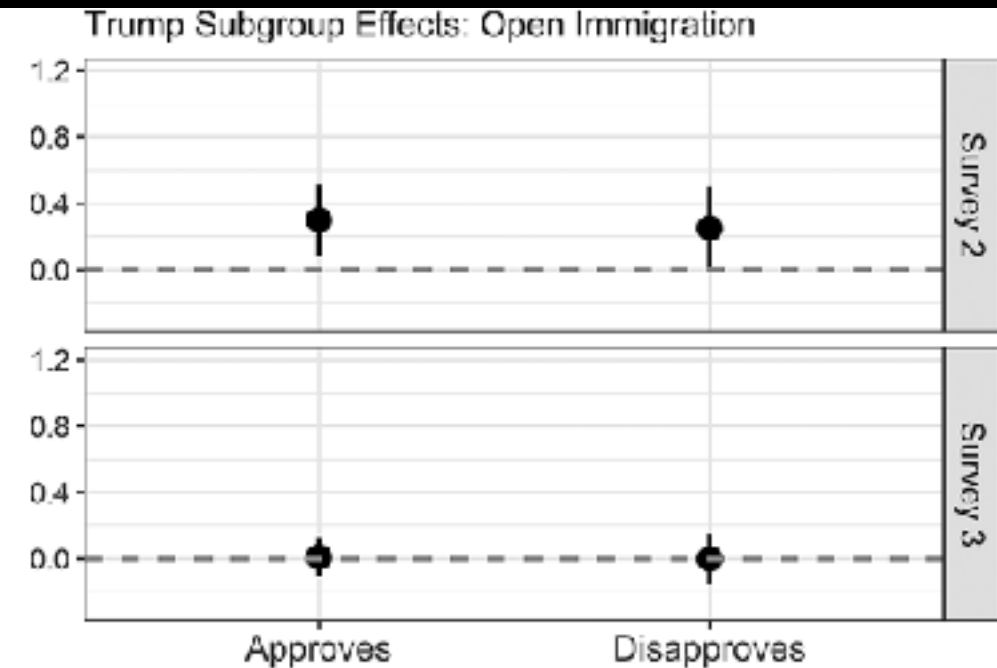

Note: Displays mean responses by treatment group for question: Do you agree or disagree that the United States should limit the number of immigrants entering the country? Scale ranges from 1 to 7, with 7 indicating support for more open immigration policies. 95% c.i.

PRIMING FAMILY HISTORY **INCREASES** **WARMTH** TOWARD IMMIGRANTS

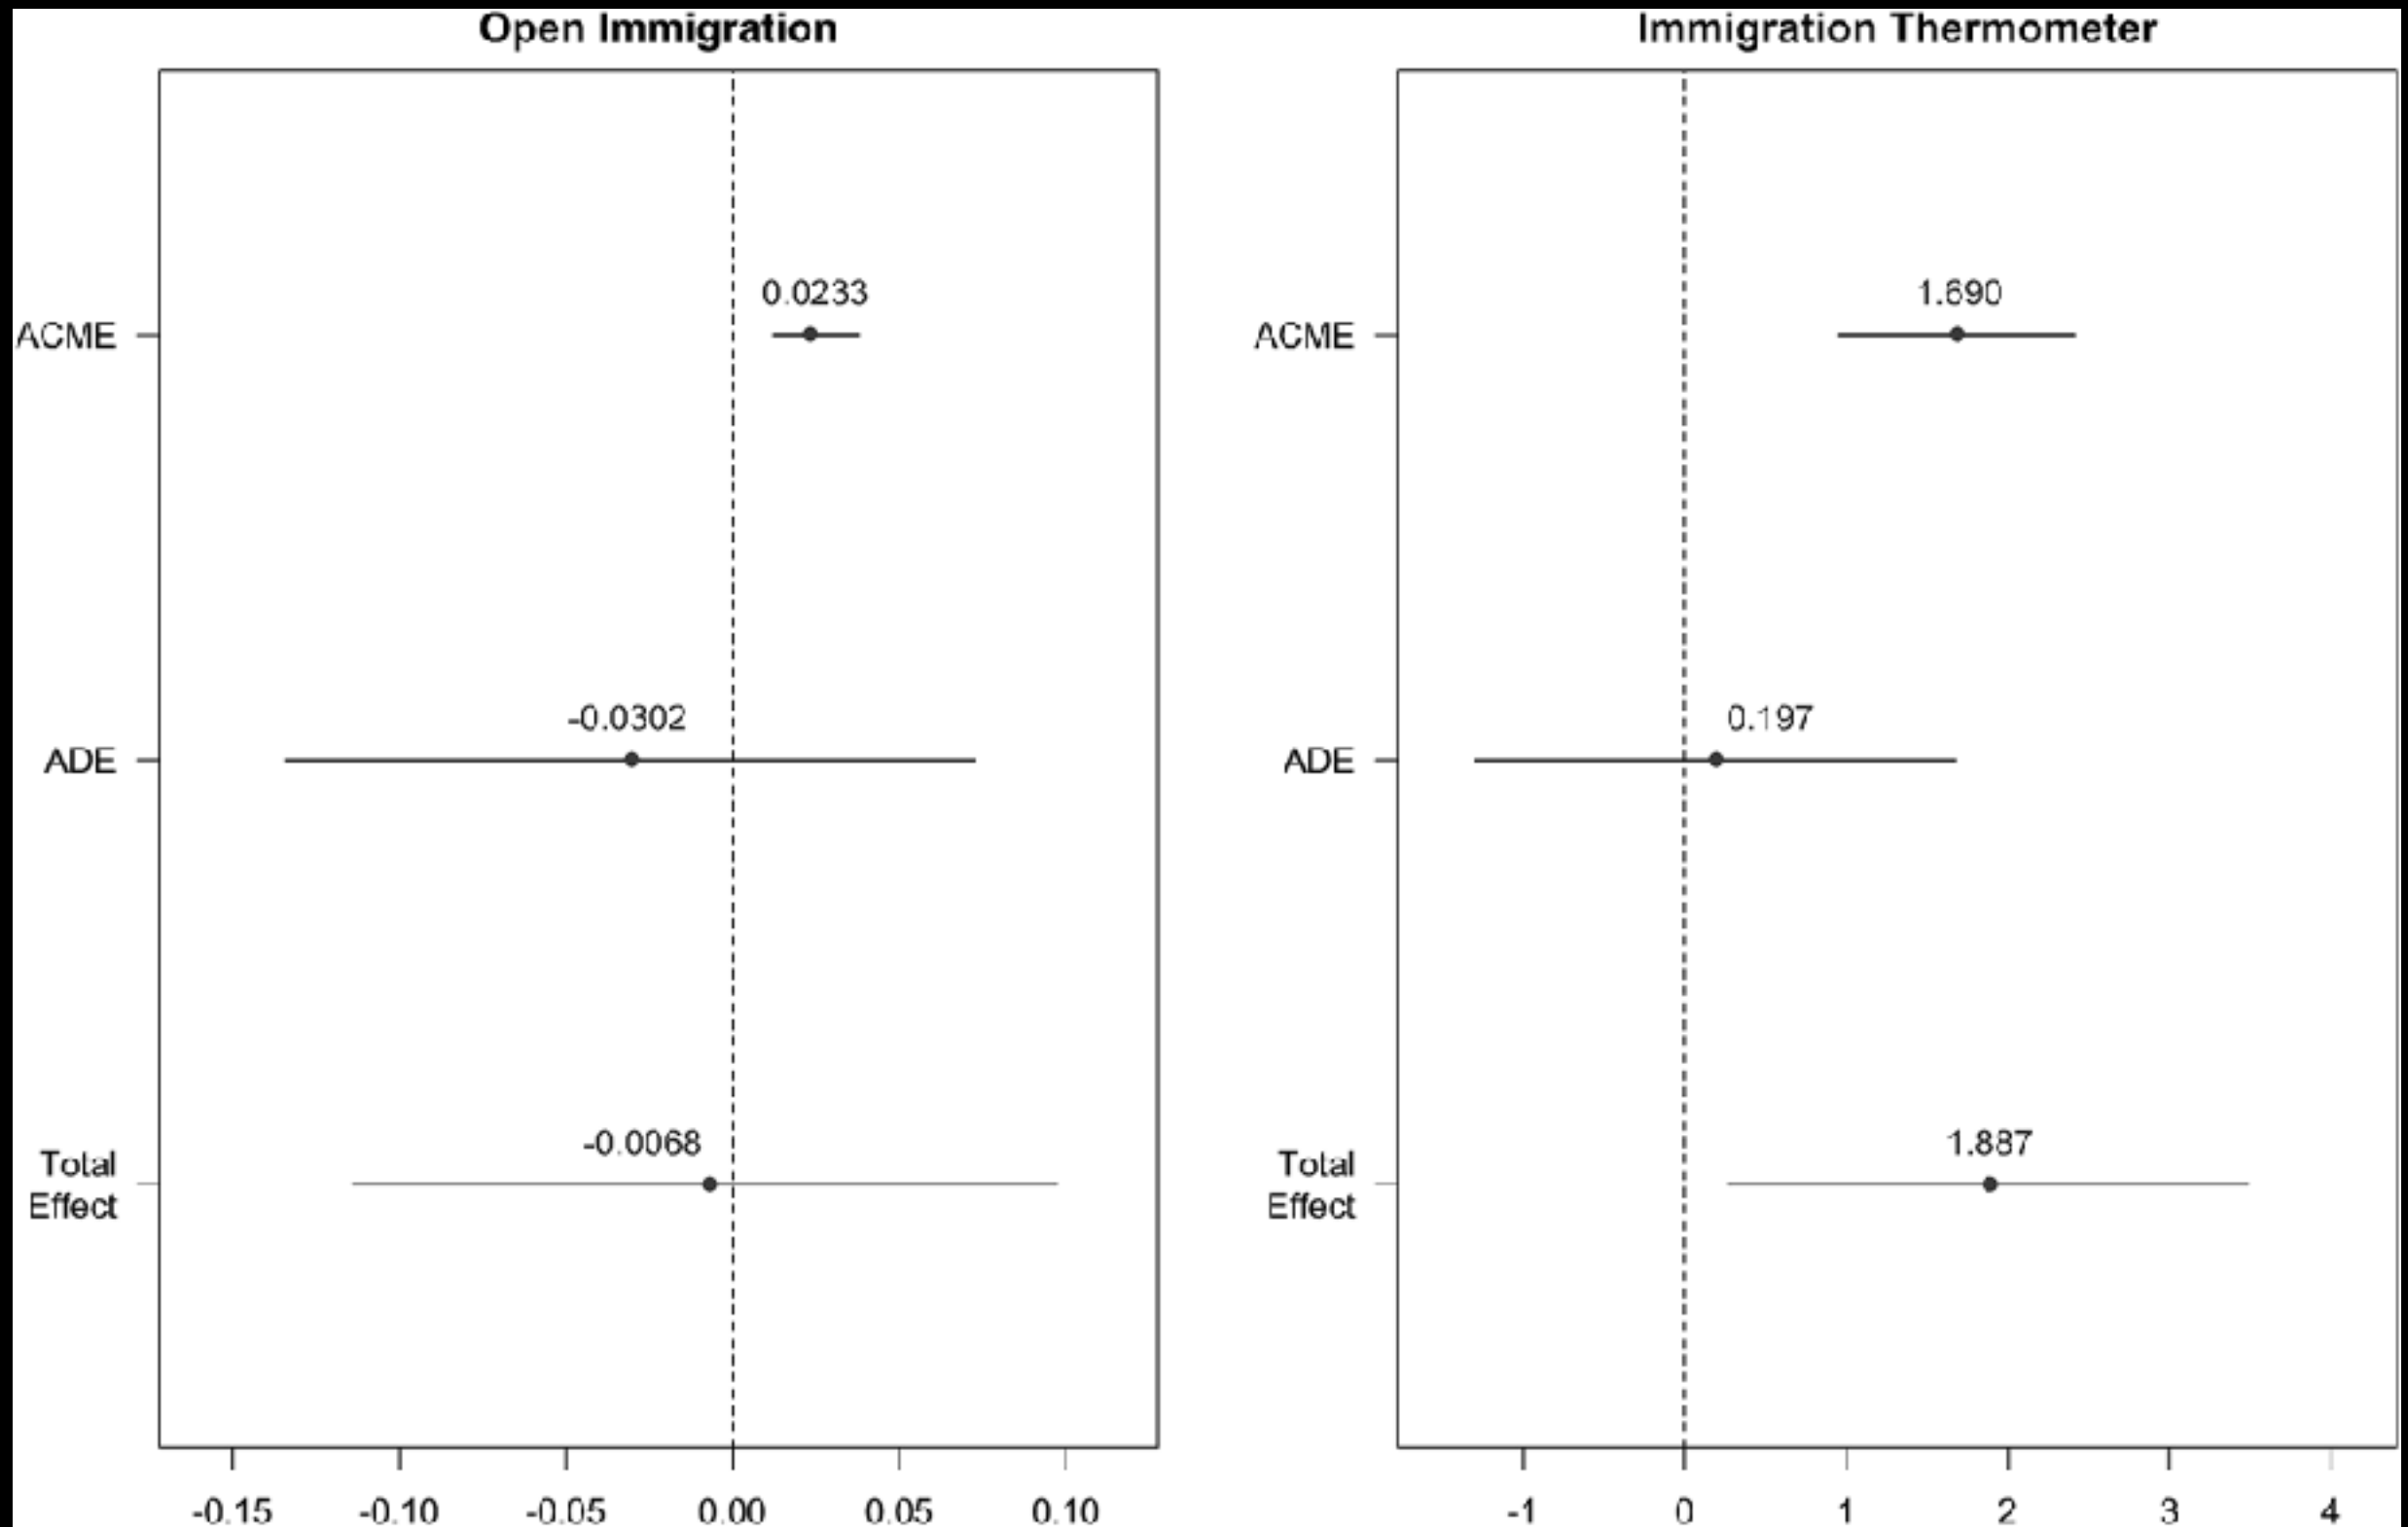

Note: Displays mean responses by treatment group for question: On a scale from 0 to 100, where 0 means "completely unfavorable" and 100 means "completely favorable," how would you describe your views of immigrants in the United States? 95% c.i.

EFFECT WORKED ON REPUBLICANS AND DEMOCRATS

EFFECT WORKED VIA EMPATHY

PSMR (2025)

- A three-study buildup to test the inclusionary effects of:
 - The most salient piece of information possible
 - The hardest test of empathy possible
- Doing this addresses important critiques that:
 - Information interventions may not work because the information is neither new nor salient
 - Empathy interventions work only on folks we already feel close to (empathy bias)

THREE-STUDY DESIGN

STUDY 1	STUDY 2	STUDY 3
IDENTIFY NEW AND SALIENT INFORMATION ABOUT REFUGEES	IDENTIFY A HARD TEST FOR EMPATHY	TEST THESE INTERVENTIONS INDEPENDENTLY AND JOINTLY
FALL 2019	SPRING 2021	FALL 2021
N=3840	N=2011	N=9407
NOT PRE-REGISTERED	NOT PRE-REGISTERED	PREREGISTERED

STUDY 1

- What do Americans know about refugees? Not much
 - They under-estimate the proportion who are women and children
 - They over-estimate the proportion who are Muslim
 - They underestimate the amount of vetting they go through
 - Folks who get this wrong have more excluding attitudes toward refugees and refugee policy

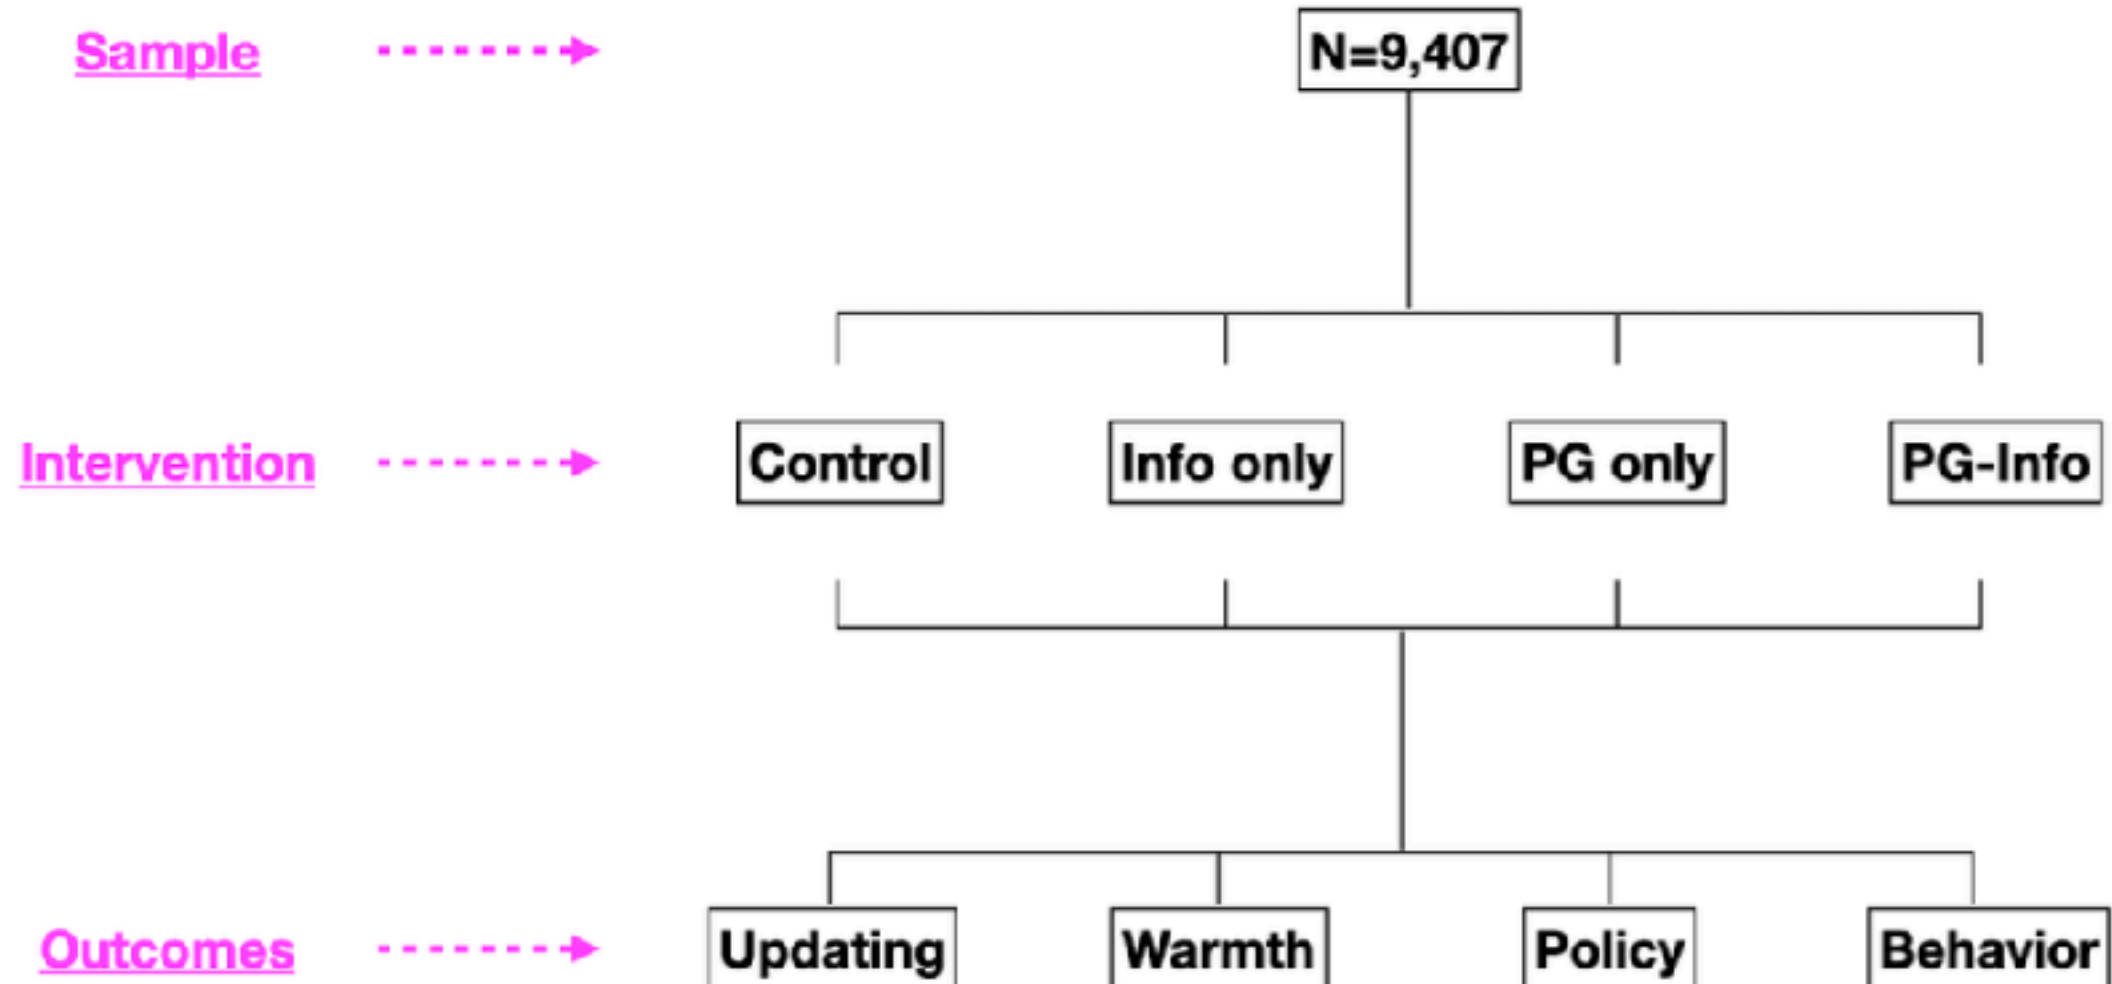

STUDY 2

- Do Americans' response to a perspective-getting exercise vary with the identify of the protagonist?
 - A refugee
 - A Muslim
 - A Muslim refugee
- Perspective-getting works less well on a Muslim refugee

STUDY 3

- We have a new and salient piece of information: how many months of security vetting a refugee goes through
- We have a hard test for empathy
- We can now test how well each intervention works, and whether and how bundling the two works

STUDY 3 DESIGN

STUDY 3 RESULTS

CONCLUSION

- There is promise to empathetic approaches to shaping public opinion toward migrants
- But questions remain about the durability and scale-up of such strategies
- What does a policy intervention drawing from these insights look like?
